

# VM-3000 SERIES INTEGRATED VOICE EVACUATION SYSTEM

***Emergency Voice Alarm System  
Incorporating Digital Audio PA, Paging and BGM***

# High-quality, compact public address system also features safety-enhancing emergency ev

## SYSTEM FEATURES

- Max. 4 MIC/LINE inputs
- 2 BGM inputs
- Up to 4 Fireman's/Remote Microphones connectable (max. 2 Fireman's Microphones)
- Max. 60 assignable speaker zone outputs (6 zones per amplifier)
- Volume setting possible for each zone
- Digital audio processed & controlled
  - Full digital audio mixing (DSP)
  - Built-in high quality electronic voice message
- Intuitive configuration
  - Zone setting, priority setting, failure detection setting by dedicated PC software
  - LCD display of current status and configuration setting of system units.

### Emergency functions

- Continuous speaker line monitoring without interruption of BGM distribution or paging announcements
- Complete fault detection and indication
- Off-site log check capability via LAN
- Both built-in and remote Fireman's Microphones
- Built-in voice alarm message
- 2-Phased voice alarm message (Alert and Evacuation) broadcasting

### Paging functions

- 2 Remote Microphone interface lines
- Paging (All zones/Group/Individual)
- 2-channel broadcast with external amplifier (Paging/BGM)

for small and medium venues  
evacuation functions.

*Integrated Voice Evacuation System  
VM-3000 series*

TOA, which boasts 50 years' experience in the development of emergency broadcast systems worldwide, now introduces a system that fully integrates emergency and general-purpose broadcast functions. The TOA VM-3000 Series is a combined emergency voice alarm system and public address system that was developed as one of the members of the Venas Integrated Voice Evacuation System family. TOA has developed and will continue to develop emergency broadcast systems, always ensuring that its products comply with the voice evacuation safety standards, such as EN54-16, established by the countries where those products are used.

The VM-3000 Series is ideal for small and medium-sized applications, such as shopping centers, retail stores, schools and fitness clubs. It incorporates such emergency voice alarm functions as continuous speaker line monitoring and a built-in voice alarm. This easy to install and set up, all-in-one system also offers PA broadcasting, paging and BGM functions that operate with uncompromisingly high audio quality to ensure consistently high intelligibility.

The VM-3000 Series is digitally audio processed and controlled, with fully digital audio mixing and a built-in high-quality electronic voice message feature. The system may be set up directly using the controls and LCD display on the front panel, which also enables easy operation of the system. Operational versatility is further enhanced by a dedicated PC software configuration capability for uploading and downloading settings via LAN. The incorporation of wide-ranging functional capabilities, superb reliability and versatility make the VM-3000 a highly cost-effective emergency broadcast system.

## SYSTEM EQUIPMENT

**VP-2241** (240 W × 1)

**VP-2421** (420W × 1)

### Power Amplifier

Power Amplifier uses the VP-200VX Power Amplifier Input Module per channel.

**VX-2000DS**

### Emergency Power Supply

The VX-2000DS Emergency Power Supply Unit supplies the DC power to each equipment in the SX-2000 system by connecting the VX-200PS Power Supply Unit.

**VX-200PS**

### Power Supply Unit

The VX-200PS Power Supply Unit is mounted in the VX-2000PF Power Supply Frame when in use.

**VX-2000PF**

### Power Supply Frame

The VX-2000PF permits the VX-200PS Power Supply Unit to be mounted in an equipment rack. Up to 3 VX-200PS units can be installed in the unit.

## SYSTEM EXAMPLE

The Venas Series also includes the VX-2000 and SX-2000 higher-end models.
